

Low Pressure Male Union

Features:

- Standard threads and curvature, no gap, no wobble and good sealing with the corresponding threads
- The PPS material has high strength, high toughness, excellent heat and chemical resistance, good electrical property and inherent flame retardancy. The high strength and rigidity at high temperatures makes it a good load-bearing material.
- Suitable temperature range -50°C~150°C

Application Note

Unit: mm

※ Can be used with RUNZE female threaded fittings and threaded bulkhead union to achieve connection of different tubes.

Model No.	Thread	Material
Low Pressure Male Union
